

Dear Benzie County Central School Community,

We wanted to share some resources and information about COVID-19 vaccines that you may find useful.

Last week, Munson Healthcare hosted a virtual townhall focused on kids and COVID-19 to dispel some of the misinformation that may have been circulating in our communities. Pediatrician Dr. Joe Santangelo led that discussion and offered a valuable perspective that we felt was important to share with our school families who may still be [considering vaccination](#).

That hourlong event was recorded and can be [viewed online here](#). In addition, Munson Healthcare has an extensive list of FAQs and other information on its website that can be reviewed [here](#).

As it has been throughout this pandemic, the health of our school communities remains a priority and we encourage you to review this material so that you fully understand the facts around COVID-19 vaccines and can make the right decision for yourself and your family.

Thank you,

Amiee Erfourth

Superintendent
