

# Summer Camp Options @ Lake Ann Elementary

Summer is a time for fun and sun and we incorporate these with some investigations and explorations to encourage learning and skill development in a fun way!

## SUMMER camp

### When

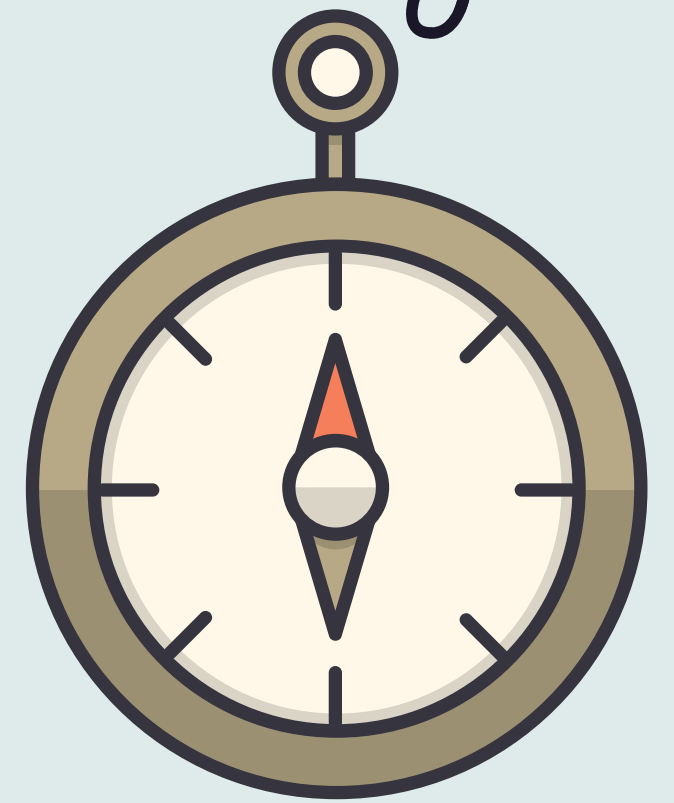

Camp runs 6/21/21-8/27/21

Each week has a different theme and families can sign up for the weeks that most interest their child or for the whole summer!

### Where

Lake Ann Elementary  
190375 Bronson Lake Rd  
Interlochen

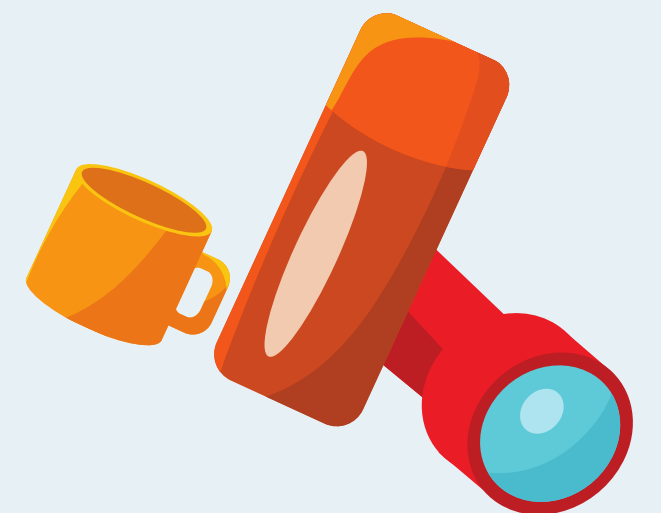

### Who

There are activities for children ages 3-10

### What – Early Childhood (preschool&Kindergarten)

- Play-based
- Weekly and Daily Themes

Monday: Make it Monday  
Tuesday: Tasty Tuesday  
Wednesday: Water Games  
Thursday: Thinking Thursday (STEM)  
Friday: Free Friday (Kids vote)

### Cost Varies by program

Full Day (9:00-4:00) \$35  
Before & After Care \$3.50/hr  
Half-day Camp (9:00-12:00) \$18  
Scholarships Available  
Registration Fee: \$30

### What – Schoolage

STEAM – Science, Technology, Arts and Math!  
Week 1: Nature Explorer (Gardening)  
Week 2: Coding and Creating  
Week 3: Restaurant Week  
Week 4: Sports Week  
Week 5: Olympics  
Week 6: Water Week  
Week 7: Camping Week  
Week 8: Storytelling  
Week 9: Harvest/Farmer's Market  
Week 10: Simple Machines

# SCHOOL-AGE CAMP DESCRIPTIONS

## Week 1: Nature Explorer (Gardening)

For our first week we will learn about our natural world. We will plan and plant a vegetable garden that will be tended all summer by our campers each week. We will also learn about local wildlife, rocks, trees and other natural resources in our community.

## Week 2: Coding and Creating

The second week we are getting technical and creative! We will learn about coding as well as have a maker space! We will create, solve problems, explore physics concepts and computer programming! It will be a great mix of technical fun and outdoor adventure with our learning.

## Week 3: Restaurant Week

This week we will create a restaurant! We will learn about recipes, the jobs associated with a restaurant, and at the end of the week we will have a restaurant open to other campers and our families!

## Week 4: Sports Week

There are so many sports to explore! From basketball to disc golf we will highlight multiple sports each day and create some of our own! Campers will learn about healthy living and having fun moving our bodies.

## Week 5: Olympics

This week we will learn about the Olympics and come up with our own Olympic games! We will incorporate all of the STEAM principles into a fun Olympic extravaganza!

## Week 6: Water Week

In northern Michigan we are surrounded by water!! We will learn about our lakes and rivers, explore water concepts like density, sinking and floating, as well as the water cycle and what makes our lakes so unique. Campers will be scientists and water fun participants!

## Week 7: Camping Week

Camping is so much more than pitching a tent and sleeping outside! This week campers will learn about camping, survival skills, and how to work together to utilize natural items to solve-problems.

## Week 8: Storytelling

So much goes into telling a good story! We will listen to some stories, enjoy some active storytelling, create some stories of our own, and put together props, visuals, and other supports for great storytelling!

## Week 9: Harvest/Farmer's Market

This week campers will harvest the vegetables from our garden! We will learn about all that goes into creating a farmer's market, make some recipes with local produce and do some construction to make a display for our goods!

## Week 10: Simple Machines

Simple machines are all around us and make our lives easier every day! Wheels and axels, levers, pulleys, and so many more! This week we will learn about simple machines, use simple machines and create some mazes!
